

Dear Customer,

Our records indicate we have not been out to service your well since installation. Because you have a private well, you are solely responsible for the maintenance of your well and the safety of your water.

Water Central is a full service water well contractor who takes the care of your well and water supply very seriously. Why take the chance of putting yourself in an emergency situation where your water pump fails due to lack of maintenance.

Why is it a good idea to have your water well checked annually?

- An annual checkup by a licensed or certified water well contractor is the best way to ensure problem-free service and quality water.*
- Preventative maintenance usually is less costly than emergency maintenance.*
- Good well maintenance can prolong the life of your well and related equipment.*

Enclosed please find a comprehensive preferred customer maintenance agreement, detailing the service provided by our company. Please don't hesitate to contact us if you have any questions.

Call 609-957-5750 for service today and protect your investment.

We appreciate your business

Chris Ritson
